

ADVANCES IN TRANSPORTATION STUDIES

An International Journal

Special Editors: Alessandro Calvi & Fabrizio D'Amico

2016 Special Issue, Vol. 2

Contents

- | | | |
|--|-----|--|
| D. Jolovic, A. Stevanovic, P. T. Martin | 3 | Revision of left-turn guidelines using optimal design of traffic signal phasing in a microsimulation environment |
| N. Stamatiadis, T. Sallee, A. Kirk | 17 | Left turn guidance based on crossing conflict analysis |
| H. Abou-Senna, E. Radwan | 27 | Operational evaluation of partial crossover displaced left-turn (XDL) versus full XDL intersections |
| D. Roach, E. Christofa, M.A. Knodler | 41 | Safety assessment before and after implementation of roundabouts through microsimulation |
| S. Cafiso, C. D'Agostino,
R. Bąk, M. Kieć | 55 | The assessment of road safety for passing relief lanes using microsimulation and traffic conflict analysis |
| G. Guido, A. Vitale,
F. Saccomanno, V. Gallelli | 65 | Sensitivity of simulated vehicle tracking profiles for input into safety performance analysis |
| K. Amiridis, B. Psarianos | 75 | Calculation of the available 3-d sight distance by modeling the roadway as a 3-d B-spline surface |
| K.L. Hancock, W. Zhang,
H. Sardar, Y. Wang | 89 | A two-step geo-grid screening process to identify locations for safety improvements |
| Y. Tian, H. Chen, D. Truong | 103 | A case study to identify secondary crashes on Interstate Highways in Florida by using Geographic Information Systems (GIS) |
| A. Omidvar, E.E. Ozguven,
O.A. Vanli, R. Moses | 113 | Understanding the factors affecting the frequency and severity of aging population-involved crashes in Florida |
